URSB Business Name No. 80042478565850

TAX (URA)
TIN 1059194234

OPERATING SINCE
2022
Registered 21 July 2026

TEAM · LEADERSHIP
15 people
Victor Bee Mubangizi, Founder & CEO

CORE CAPABILITIES

CATEGORY	CAPABILITIES
Software development	Enterprise software, web applications, mobile applications (Android and iOS)
Digital transformation	Digitisation of manual business processes, records and approvals; workflow automation; staff training
Systems integration	Connecting business systems and services: APIs, MTN MoMo and Airtel Money, SMS, third-party and legacy systems
Database solutions	Database design, management, data migration and reporting (PostgreSQL, Supabase, Firebase)
Cloud solutions	Cloud-based platforms and infrastructure, hosting, business email, automated deployment and monitoring
ICT consultancy	Technology assessment, solution architecture, implementation planning and technical support

DIFFERENTIATORS

Local understanding
Built in Uganda for Ugandan users: mobile money, SMS, patchy connectivity, local workflows.

Product builders
We design, build and operate our own live products, not only one-off projects.

One accountable team
Discovery, design, engineering, integration, training and support from one supplier.

Long-term support
Direct support by phone, WhatsApp and email after go-live; your data stays exportable.

RELEVANT PROJECT EXPERIENCE

PROJECT	SCOPE	STATUS
FarmTap Own product · Agriculture	Dairy and livestock farm management: milk, herd, health, breeding, feeds, workers, money, reports, AI insights.	LIVE
Enphitic Own product · Construction	AI assistant and studio for planning, designing and costing buildings, with prepaid credit billing.	LIVE
School Pulse Own product · Education	School management: attendance (incl. offline), fees, academics and parent communication.	REGISTRATION OPEN
BeeTransit Own product · Transport	Bus operator platform: POS ticketing, NFC cards, crew boarding, parcels, GPS tracking, passenger app.	IN DEVELOPMENT

Client implementations are published only with client approval. References can be arranged directly during procurement. Case studies: victorbee.com/projects

SECTORS

Government & public sector · Education · Agriculture · Healthcare · Business & enterprise · NGOs · Transport

TECHNOLOGY

Flutter, React, Node.js, Python, PostgreSQL, Supabase, Firebase, Cloudflare, MTN MoMo & Airtel Money APIs, Africa's Talking, AI (Claude)

HOW WE DELIVER

1. **Discover**
   We meet the people who do the work, map the current process and agree the real problem, scope and success measures.
2. **Strategise**
   We choose the right approach, architecture and phasing, and agree budget, timeline and responsibilities in writing.
3. **Engineer**
   We design and build in short iterations, with regular demonstrations so your team sees progress and gives feedback early.
4. **Implement**
   We deploy, integrate, migrate data and train users on site or remotely, starting with a controlled pilot where appropriate.
5. **Support**
   We measure what changed, fix issues quickly and keep improving the system after launch.
